

## EXCAVATOR AUGERS

Premier manufactures both medium duty and heavy duty high flow earth auger attachments for use with all types and brands of excavators. All units are industrial strength, engineered to handle the higher hydraulic operating pressures of today's excavators while holding up to years of use. No third drain line is required for any of our augers. Our high torque drive units work in even the toughest digging conditions. Available output shafts are 2" hexagon, 2-1/2" hexagon. We build mounting brackets for augers to work with pin-on buckets, OEM quick couplers, after market couplers and custom mounting brackets. Our mounts include the cradle function which holds the drive unit and auger bit secure when moving the machine.

<b>Model</b>	<b>H045PD</b>
GPM Range	25-45
Max Rec. Auger Dia.	48"
Max Hydraulic PSI	4500
Digging Torque	5798 ft/lbs
Application	Medium Duty
<b>Model</b>	<b>H055PD*</b>
GPM Range	30-50
Max Rec. Auger Dia.	48"
Max Hydraulic PSI	4500
Digging Torque	7325 ft/lbs
Application	Medium Duty
<b>Model</b>	<b>H065PD</b>
GPM Range	30-60
Max Rec. Auger Dia.	48"
Max Hydraulic PSI	3500
Digging Torque	9156 ft/lbs
Application	HEAVY DUTY
<b>Model</b>	<b>H075PD*</b>
GPM Range	30-60
Max Rec. Auger Dia.	48"
Max Hydraulic PSI	4500
	12,790 ft/lbs

Digging Torque	HEAVY DUTY
<b>Model</b>	<b>H085PD</b>
GPM Range	30-60
Max Rec. Auger Dia.	48"
Max Hydraulic PSI	3500
Digging Torque	12,539 ft/lbs
Application	HEAVY DUTY
<b>Model</b>	<b>H095PD*</b>
GPM Range	30-60
Max Rec. Auger Dia.	48"
Max Hydraulic PSI	4500
Digging Torque	17,941 ft/lbs
Application	HEAVY DUTY

\*shows the most common excavator augers installed on excavators

The models shown above are typical auger types used on excavators. If you have a different requirement, Premier can engineer and custom build an auger unit that will unleash the full potential of your application.

Premier manufactures an assortment of earth auger bits from which to choose depending upon the job at hand and the quality desired. Our stock standards are:

- Medium duty double flight, standard type auger with 4' overall length
- Heavy duty double flight auger for tougher conditions that call for a more aggressive bit, overall length is 4'
- Heavy duty utility style bits for use with high torque auger systems, 5' and 9' overall length

Rock augers with carbide bullet tooth, hard-faced wear parts, a heavy duty center tube and thicker flighting are also available. Premier also manufactures custom augers and custom continuous flight augers to meet customer specifications. Flighting on all Premier augers is fully welded to the center tube, not stitch-welded like some of our competitors. Connecting collars are available in 2-9/16" round, 2" hexagon, 2-1/2" hexagon, 2-5/8" hexagon, 3" hexagon and 3" square.

Premier keeps a full line of auger parts and components in stock. View Premier's complete line of earth augers and other related products in our [earth augers catalog](#). (PDF 1.7 MB)
